Our climate commitment

We are a member of the SME Climate Hub and a signatory to the SME Climate Commitment. We commit to halving emissions by 2030, reaching net zero by 2050 and reporting progress each year.

Reducing emissions through our work

- Consolidate site visits and use local labour to reduce transport emissions.
- Use local subcontract trade partners and local supply chains.
- Reduce material waste through accurate measurement, ordering and off-cut management in joinery work.
- Source timber and joinery materials responsibly.
- Segregate and manage waste responsibly on every site, under our Waste Management Policy.

Implementation and reporting

These measures are supported by our Environmental Policy and Environmental Management System Manual. Our directors oversee implementation and our commitment to annual progress reporting.

Review

This policy is reviewed annually and earlier if our activities or relevant requirements change.
